

HOW TO ADD A CUSTOM PRODUCT

1. Login to TracMap online, at the top of the page select 'ADMIN' and then in the sub tabs select "Products".

2. Here you can select "Add Product". This will open another pop up.

A screenshot of the 'Create Product' pop-up window in TracMap online. The window has a title bar 'Products' and a close button 'x'. Inside, there is a 'Create Product' tab. The form contains the following fields:

- Label:
- Info:
- Supplier Code / Barcode:
- Unit Type:
- Units: /
- Overlay Colour:
- Nutrient percentages: % N, % P, % K, % Ca, % Mg, % S, % B, % Cu, % Fe, % Mn, % Na, % Zn, % Se, % Co (each with an input field)
- Harvest Restriction: days, hours
- Human Entry Restriction: days

At the bottom right, there are 'Cancel' and 'Ok' buttons.

3. Here you can enter nutrient information. You don't need to enter nutrient information, it is however essential if you wish to gain nutrient reports on that product. Make sure you select the correct units for your product type e.g if it's a spray you would need it to be L's or mL's. Once you've filled in the required information you can then select "Ok" and this product will now be added to your product list.
