

HOW TO

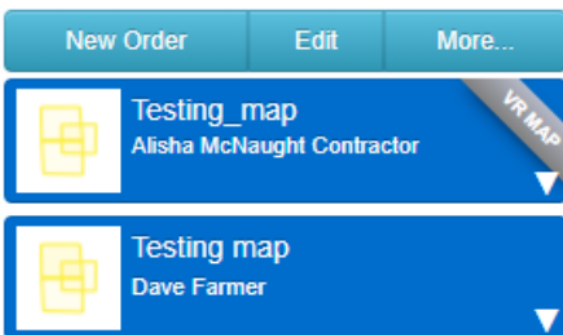

# HOW TO CREATE A VARIABLE RATE ORDER

To create a variable rate order first you need a variable rate map and a standard map. If you don't have these please refer to the [How to create a variable map guide](#).

1. Login to TracMap online, at the top of the page select **'MAPS'**.

## Selected Maps

2. In your maps tab, select both your variable rate map and your standard map. From here you can select the blue **'New Order'** button. This will take you through to the new order screen.

## Products

Add Product

## Products

10% Potash Sulphur Super

3. Here you can select your products and coverage as you would in any normal order. As you can see, when you select a product it will no longer ask you for a rate, as the rates are carried on the variable rate map. Once you've selected coverage and a product or products, you can now submit your order like normal and assign it to a vehicle.
